Please join us on **Thursday, December 9th from 6:00-7:30pm** for a suicide prevention training, please fill out the registration link below to attend. All NSD high school parents/caregivers are welcome.

This training is important for your child and their friends.

Parent/Caregiver Suicide Prevention Training Registration:

Suicide is the second leading cause of death for youth ages 14-24 in Washington and the United States. Many suicides are preventable! Mental health problems among young adults are more common than many families realize. Parents and family members sometimes struggle to understand their student's mental health concerns—or even to recognize that their student is in distress. Learning that their student is having suicidal thoughts can create extreme stress for the family. This training provides resources to help parents and families support those who are struggling with their mental wellness.

7. **Talking with your student(s) about fentanyl (from Nurse Jean)**

With the first months of school now behind us and young people more used to re-engaging with their peers, it's a good time to have an open and honest conversation with our kids about fentanyl.
